

# OptiGROW

The Ultimate Broiler Nipple  
Optimized for Growth

## Low Thread Projection

Less restriction of water flow for better flushing.

## Acid-Resistant Material

The special quality and grade of materials used provide the best protection against acid corrosion.

## Hygienic Surface

The smooth inner surfaces avoid deposits and provide minimal friction for easier triggering.

## Increased Wall Thickness

Thick walls offer a more robust design and better chemical resistance.

## Large Body

The large body provides better visibility.

## Hygienic Design

The new nipple body helps keep the nipple clean.

## Adapter Area

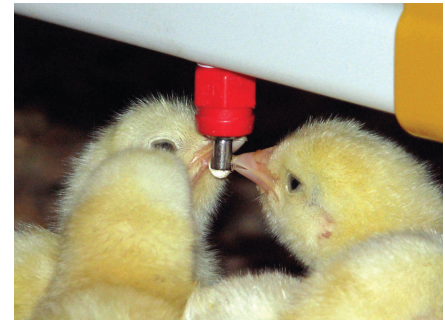

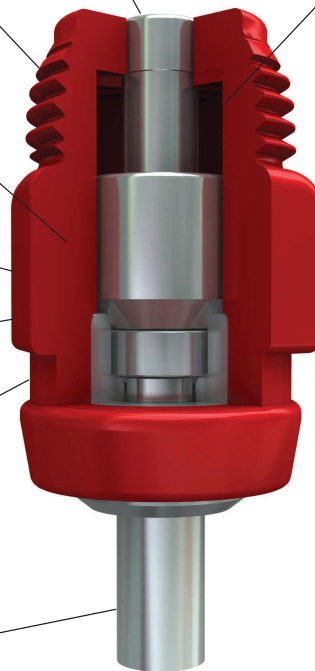

Accessories can be directly attached to the nipple body.

## Easy Triggering

Less triggering force gets day-old birds off to a fast start.

## Large Diameter Pin

The large diameter of the pin holds a large water drop.

The all-new **OptiGROW** nipple is designed to work in today's challenging poultry environment. Because the nipple has been **optimized for growth**, you will be amazed by the first-week low mortality results and increased weight gains on jumbo birds.

If you're a serious grower, bent on getting the most out of your production, we encourage you to contact us to find out how our new **OptiGROW** nipple can make a difference for you!
